SEARCHING THE VISIBLE WEB

Automated Search engines

Finding reliable information using a standard search engine: "Google-ing" (Good, but not perfect!) <http://www.google.com>

<http://www.google.com>

example: Greenspan's site - <http://www.stanleygreenspan.com/>

example: Hidden Laughter - <http://www.hiddenlaughter.com/index.html>

example: Relationship-Based Intervention, or Floor-Time by parent,
David Nelson - <http://www.mindspring.com/~dgn/davefaq.htm>

example: Indiana Resource Center
<http://www.iidc.indiana.edu/irca/SocialLeisure/playtime.html>

Some ways to make Google work better for you

- Choose keywords carefully
- Understand how search engine is "searching"
- Use quotation marks (full-text searching)
- Unique features -- * and ~
