

Caseload and Workload for Ohio's SLPs Working in Schools

OSHLA Education Caucus

March 11, 2006

Presented by Terri Farnham

NCO SERRC

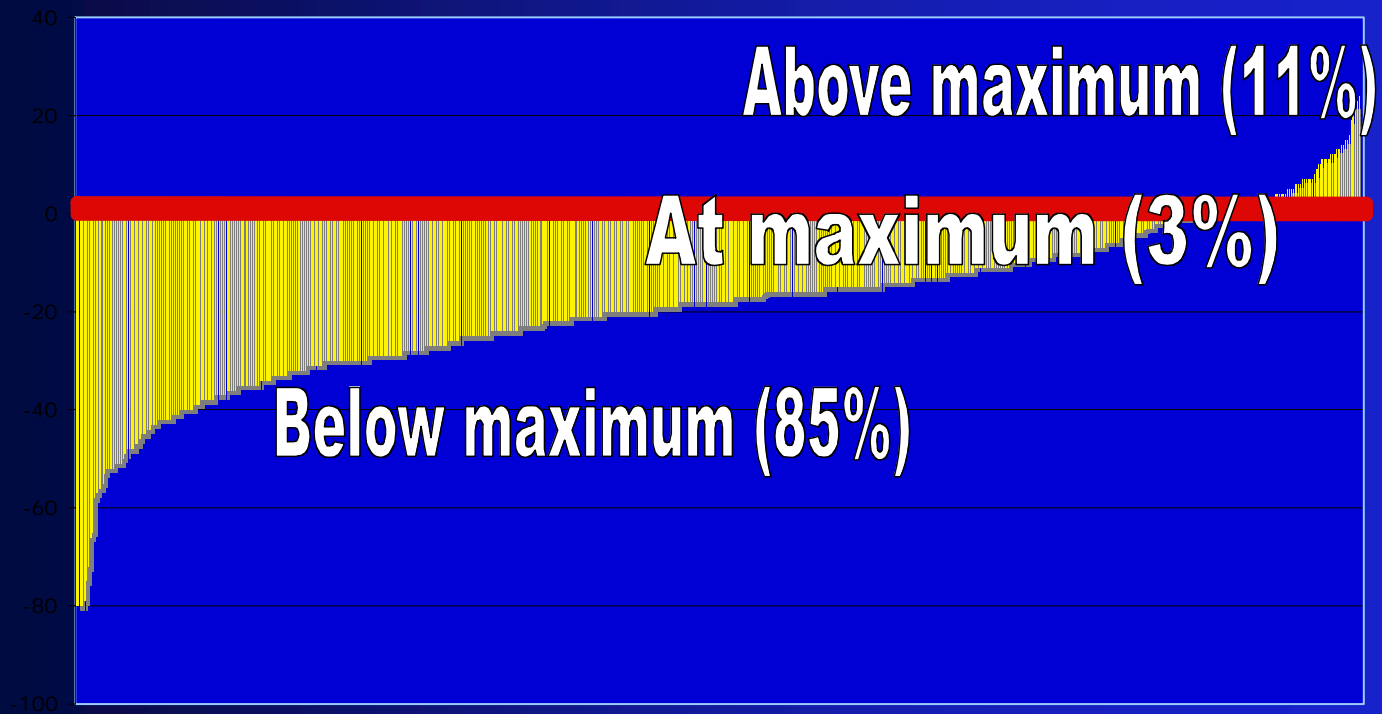

Farnham.teresa@ncoserrc.k12.oh.us

The Data

- Caseload data collected during 03-04 and 04-05 school years
 - 821 responses (4 Audiologists)
 - 79 of Ohio's 88 counties represented
- Workload data collected from February 04-January 05
 - 83 SLPs documented how they spent their work day every day for 1 week
 - Based on ASHA's workload study

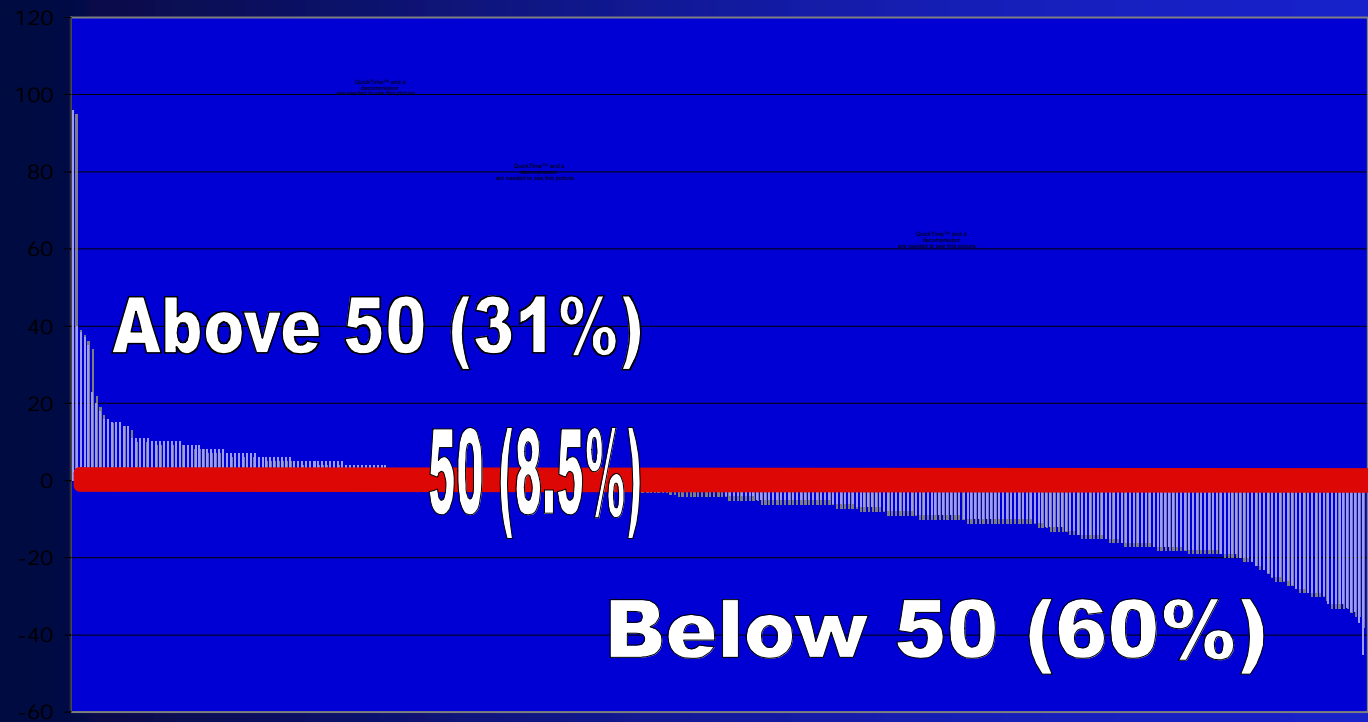

Caseload for School-age (n=635)

Variation from School-
Age Maximum of 80

Caseload for Preschool (n=329)

Preschool Caseloads Compared to State Maximum of 50

Caseload Summary

	Mean	Range	+/- 1 S.D.
School age	59	5-160	43-75
Preschool	40	5-146	27-53

Workload

- Direct Service
- Indirect Service
- Indirect Service in General Education
- Compliance
- Case Management
- Other

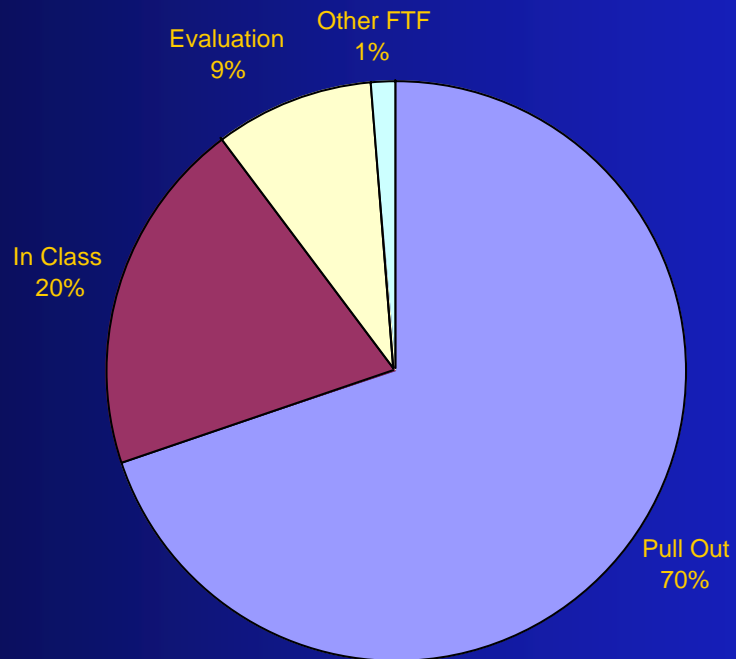

Workload

Case Management (9%)

Case Management Breakdown

Where do we go from here?

- A closer look at the workload data
- Self-evaluation
 - Use ASHA workload documents to analyze your own practice
 - Review workload for possible alternate solutions (secretarial help, for example)

Where do we go from here?

- Review individual students using workload model to determine
 - How much time should be allotted for that student for all services needed
 - What might be the most effective service delivery model
